

About Pension Committee

What's the Pension Committee

The Pension Committee is made up of workers from Local 1751 who are committed to raising awareness among their members about the importance of financial education. Their mission is to help members make informed decisions as they prepare for retirement.

To achieve this, the committee shares relevant information about various sources of retirement income and provides access to a revenue calculator for realistic projections. They also respond to members' questions via email regarding the two main types of pension plans: PPME/MEPP (Defined Benefit/Legacy).

In addition to these services, the committee organizes and delivers information sessions in both official languages.

Employees hired before July 2012 please refer to HR Connex on Aeronet to see projection of your pension benefit.
